

# Stock Exchange Announcement

To the Copenhagen Stock Exchange and the Press

Noerresundby, Denmark, 23 May 2005  
Stock Exchange Announcement no. 07/2005  
No. of pages: 2

## RTX Telecom Group receives additional orders from Atlas Telecom Network Romania

*Summary: The RTX Telecom Group has received additional orders from Atlas Telecom Network Romania concerning the delivery of wireless DECT products. The orders represent a double-digit million sum in Danish Kroner, and shipment of the first products are expected to take place in the first half of the coming 2005-06 financial year.*

The RTX Telecom Group has received additional orders from Atlas Telecom Network Romania concerning the delivery of wireless DECT products.

In an extension of the contract referred to in the 20 January 2005 Announcement to the Copenhagen Stock Exchange, No. 02/2005, the Group has received additional orders for wireless DECT products used in the so-called Wireless Local Loop (WLL) system. This telephone system will provide an inexpensive and efficient telephone service to customers in Romania, based on wireless connections to individual subscribers. The system may eventually be extended to customers in other eastern European countries.

The orders received represent a double-digit million sum in Danish Kroner, based on delivery of the final product. The RTX Telecom Group will be outsourcing production to subcontractors.

If the products succeed on the market, there are good chances that the Group will receive additional orders.

The orders do not affect the RTX Telecom Group's general outlook for the 2004/05 financial year. Shipment of the first batch of products is expected to take place in the first half of the coming 2005/06 financial year.
