Announcement No. 09/2004
Number of pages: 1

RTX Telecom has reached an agreement with Nesa on the delivery of 20,000 communication modules for remote reading electricity meters

Summary: RTX Telecom has reached an agreement with Nesa on the delivery of 20,000 communication modules for remote reading Smart Read™ electricity meters. The modules are expected to be delivered in the spring of 2005.

RTX Telecom has entered into an agreement with Nesa on the delivery of 20,000 communication modules for the remote reading of Smart Read™ electricity meters and monitoring of the supply voltage. The module will enable Nesa to carry out continuous and precise remote readings of electricity meters and charge customers for their exact consumption. Customers will have the benefit of being able to follow the development of their power consumption on a running basis by means of detailed reports provided on an individual web page. The communication module transmits the readings to Nesa via a GSM/GPRS unit.

Expected delivery of the modules is spring 2005.

The agreement is expected to have a positive influence on RTX Telecom's net turnover and earnings for the financial year 2004/2005. Management forecasts for the financial year 2004/2005 will be presented in connection with the publication of RTX Telecom's annual report for 2003/2004 in December 2004.

With regards,
RTX Telecom A/S

Jorgen Elbaek
CEO
