## RTX Telecom A/S participates in a capital increase for Thomsen Bioscience A/S

*Summary: New and existing shareholders in Thomsen Bioscience A/S have injected DKK 11.0 million additional capital into the company in order to strengthen its financial base. The proceeds will be used for development and maturing production of the first products, which are expected on the market in 2005.*

New and existing shareholders in the biotech company Thomsen Bioscience A/S have injected DKK 11.0 million additional capital through the issue of new shares in the company. The capital increase consists of a cash injection of DKK 8.0 million contributed by new shareholders and the conversion into equity capital of DKK 3.0 million outstanding debt in the company owed to existing shareholders.

RTX Telecom has previously invested DKK 3.0 million in shares in Thomsen Bioscience. As part of the capital increase just carried out RTX Telecom has subscribed to new shares in Thomsen Bioscience for a market price of DKK 2.3 million.

The capital increase has not led to any significant change in RTX Telecom's hitherto 19.4 percent holding in Thomsen Bioscience.

Thomsen Bioscience's most important development project comprises the development of portable sensors for the detection of biological weapons and infectious diseases. Development work focuses on the integration of advanced biological methods into biochips, so-called intelligent "lab-on-chips". The technology can be applied to the detection of biological weapons, clinical diagnosis of infectious diseases and the development of pharmaceutical products.

Thomsen Bioscience and RTX Telecom have entered a partnership agreement according to which Thomsen Bioscience focuses on collection and detection principles, whilst RTX Telecom focuses on general electronic and software development, project management and the development and integration of wireless communications systems.

The recent capital increase will help reinforce Thomsen Bioscience's activities through, for instance, improved opportunities for carrying out development and production maturing work on the first products, which are expected on the market during 2005.

The Thomsen Bioscience capital increase is not expected to have a significant influence on RTX Telecom's turnover and earnings for the 2004/05 financial year.

With regards,  
RTX Telecom A/S

Jorgen Elbaek  
CEO
