

Announcement

To the Copenhagen Stock Exchange and the press

*Nørresundby, Denmark 22 November 2000
Stock Exchange Announcement no. 10/2000*

RTX Telecom signs an epoch-making agreement, extending over several years, to supply Bluetooth™ to Agilent Technologies

Agilent Technologies, the world's largest supplier of professional measuring equipment, has chosen to supplement its range of measuring solutions for the professional market with RTX Telecom's Bluetooth(tm) RF Tester. This tester will subsequently be marketed in modified form under the name of Agilent E1852A.

According to the terms of this new agreement, RTX Telecom will be responsible for development, production and testing while Agilent Technologies will be responsible for marketing and support. Agilent Technologies' global trading network will thus provide opportunities for sales and support of the Bluetooth(tm) Tester in all parts of the world.

The agreement with Agilent Technologies represents a significant breakthrough for RTX Telecom's advanced Bluetooth(tm) technology platform and at the same time cements RTX Telecom's position as the leading supplier of solutions and products to the Bluetooth(tm) market.

In the last two years, RTX Telecom has carried out a focused R&D drive relating to Bluetooth(tm) technology. This development work has involved both hardware and software.

The agreement between RTX Telecom and Agilent Technologies will be announced to Bluetooth(tm) professionals during the forthcoming Bluetooth(tm) Developers Conference in San Jose, California. RTX Telecom is co-sponsor of the conference, which will be held 5-7 December 2000.

The agreement with Agilent Technologies is expected to have a positive influence on RTX Telecom's turnover and profits from and including the second half of the 2000/2001 financial year, which ends on 30 September 2001.

With regards
RTX Telecom A/S
